

## APPARATUS AND METHOD FOR DISPLAYING TRADING TRENDS

## ABSTRACT OF THE DISCLOSURE

The present invention provides an apparatus and method of determining and displaying trading trends for an investment underlying one or more options wherein an opening value and a closing value for the underlying investment for two or more time intervals is obtained. An opening value trend using a market trend indicator and the opening values for the investment is calculated, and a closing value trend using the market trend indicator and the closing values for the underlying investment is calculated. A visual indicator comparing the opening value trend to the closing value trend for the underlying investment is then displayed. This method may be incorporated into a computer program embodied in a computer readable medium using code segments to accomplish the method described above.
